

ISO 27001 CERTIFICATION ASSISTANCE

Information Security is as complex as it is critical, which is why organisations often struggle to take meaningful steps in the right direction. Yet both the solution and the path towards it are neatly summarised by ISO 27001 – the global best practice for Information Security Management Systems (ISMS).

The advantages of ISO 27001 certification are numerous. For one, your clients and partners see that their data is in safe hands, enhancing your reputation as well as unequivocally demonstrating your governance and compliance efforts to regulatory bodies. And beyond the realm of obligation, your proactive approach delivers a host of potential benefits to your bottom line, boosting your competitive advantage, improving efficiency, mitigating both the cost and the impact of a breach, and supporting your organisation's ability to move forward at pace.

The certification process is rigorous and comprehensive, but with Mobius at your side as your implementation partner, it's a straightforward journey tailored end-to-end for your specific needs and goals. And since ISO 27001 certification isn't a once-off exercise but a process of continuous monitoring and improvement, we ensure the transfer of valuable knowledge and skills, also providing ISMS maintenance for clients who are already certified.

As for our track record, we have successfully assisted multiple clients of varying sizes across a range of industries globally. Whether you're just beginning your journey, continuing it, or transitioning from ISO 27001:2013 to the newest iteration, we'll help you secure digital trust – and keep it.

THE MOBIUS ADVANTAGE

EXPERTISE

- Specialist ISMS knowledge and global expertise
- ISO 27001 Lead Implementer
- ISO 27001 Lead Auditor
- Certified Information Security Manager (CISM)
- Certified in Risk and Information Systems Control (CRISC)
- Planning and set-up of ISMS programme
- Develop and implement key ISMS artefacts
- Change Management

APPROACH

- Practical and simple methodology for easy adoption
- Digitally focused
- Advisory services with knowledge, skill transfer and digitisation across implementation

RESULTS

- Your ISMS artefacts aligned to requirements of ISO 27001
- Embedment of technology to sustain your ISMS, which is tried and tested
- Faster ISMS build makes for a streamlined certification journey
