Actualising change

As organisations increasingly adopt Artificial Intelligence (AI) to drive competitive advantage, enhance decision making, and improve efficiency through automation, they are also facing a rapidly evolving information risk landscape.

Without adequate security and related oversight, AI can introduce bias, generate flawed or unethical decisions, expose sensitive data, and introduce new digital security risks. These unintended consequences, coupled with a lack of AI security governance, could result in significant risks, including the erosion of Digital Trust and financial damage. Further, organisations are facing increasing pressure to adhere to global regulatory requirements, such as the EU AI Act, that require organisations to exercise the necessary safeguards, privacy and secure use of AI data.

The right approach to managing AI-related risks is to adopt industry standards and good practices, such as ISO 42001 and NIST AI RMF, to design, implement and maintain a robust Artificial Intelligence Management System (AIMS).

Securing AI goes beyond technical controls – it starts with defining the intended use and expected benefits of AI, knowing where and how AI is being used, an organisation-wide awareness of the risks, and developing guiding policies which govern the use of AI.

WHY MOBIUS

The Mobius approach helps you to use, manage and secure AI with confidence. We assist you in understanding your AI Security posture and risks, developing an effective AI Management System, and continuously maturing your AI security over time.

OUR TEAM OF EXPERTS OFFER:

- AI Security assessments in alignment with industry best-practice standards and relevant regulations, such as ISO 42001, NIST AI RMF, Gartner TRISM, CSA AI Controls Matrix, and the EU AI Act.
- The development of tailored AI governance, including AI Security strategies, frameworks, policies, lower-level standards and processes.
- End-to-end ISO 42001 implementation and certification assistance.
- AI Security training and awareness programmes.
- Ongoing AI Security reviews, to ensure your safeguards remain effective.

We are perfectly positioned to assist you in preserving Digital Trust, in an era where AI presents both opportunities and risks, and digital authenticity is more crucial than ever.

BENEFITS

Robust and adaptive AI Security governance

Enhanced trust in AI solutions

Alignment with best-practice AI Security standards, and evolving AI Security regulations

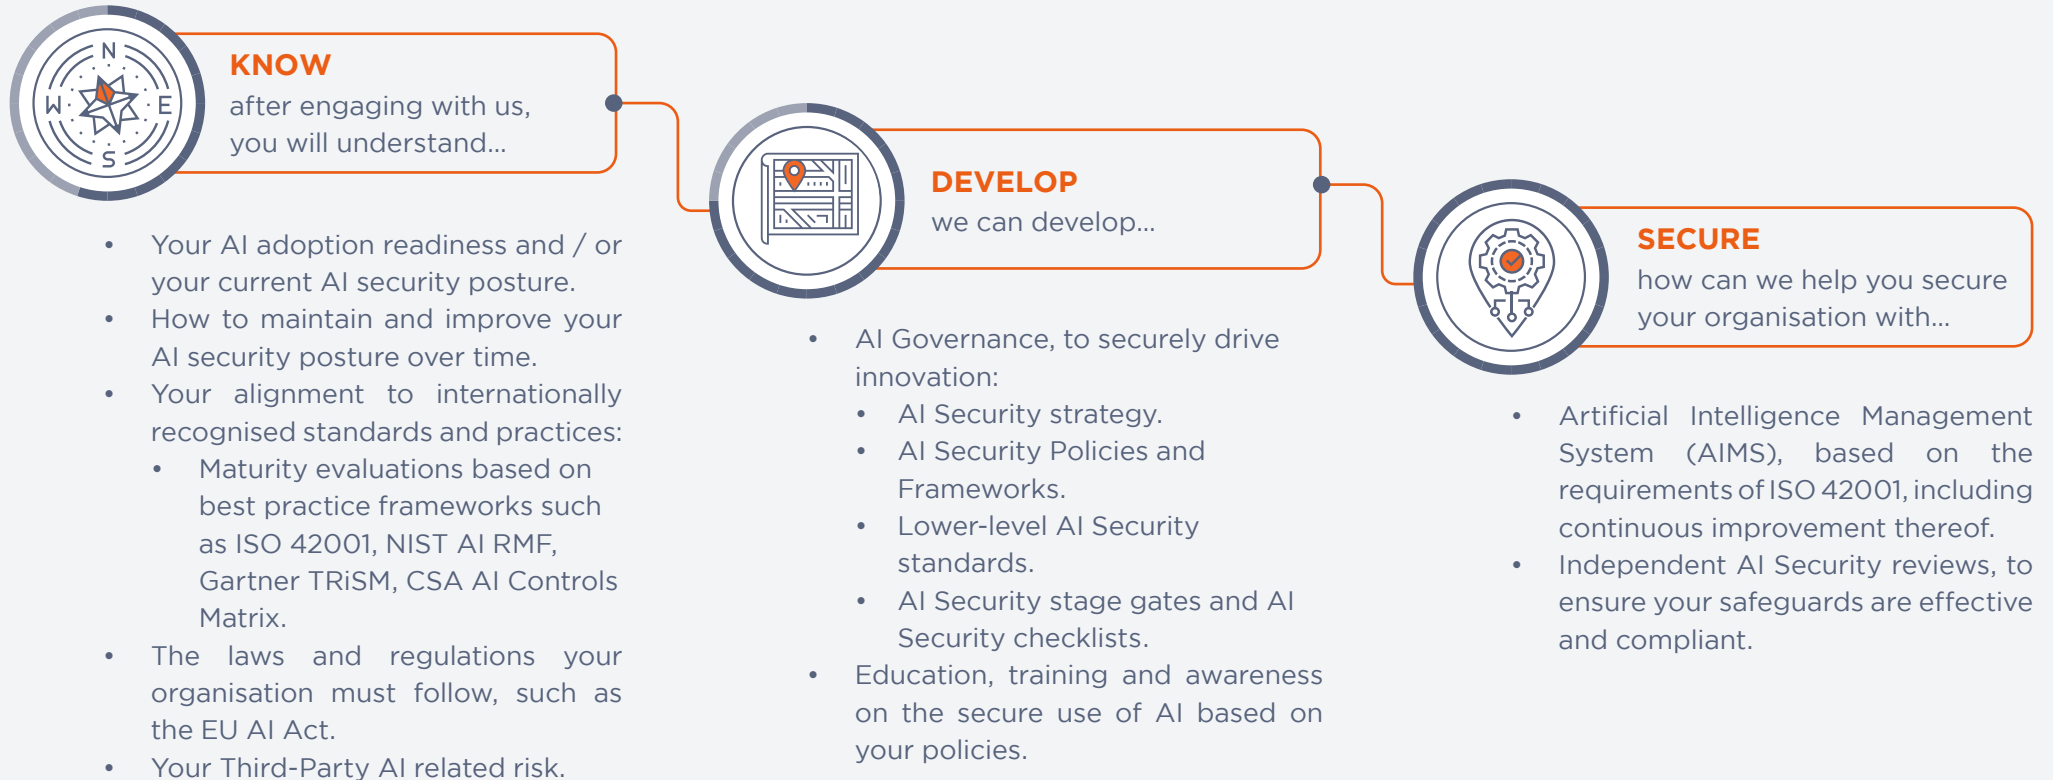

Improved AI risk management

Effective, overarching AI Management System

MOBIUS AI SECURITY

YOUR AI SECURITY JOURNEY WITH MOBIUS

Your Digital Trust Partner on your Journey

Managed Services

IS AI SECURITY AN AFTERTHOUGHT IN YOUR ORGANISATION?

Our Know, Develop, Secure approach helps you ensure the ethical, fair, transparent and secure use of AI, to enable innovation within your environment.

SECURING DIGITAL **TRUST**

SECURE YOUR DIGITAL JOURNEY

Have confidence in your
secure digital risk landscape.

DEVELOP YOUR DIGITAL RESILIENCE

We work with you to develop
sustainable data risk resilience
into your business systems.

KNOW YOUR RISK LANDSCAPE

Let us confidently accelerate
your digital journey by helping
you know your risk landscape.
